countries of deployment

SERVICES

Industrial electrical installation

Plants, production lines, cable routes, power supply for machines and process equipment.

Switchboards & automation

Switchboard wiring, measurement and control, commissioning and inspections with a certified technician.

Installers & site assistants

Cable pulling, tray installation, preparation and support work on site.

Building electrical installation

Residential, office and commercial buildings, power and low-voltage systems.

Solar PV & EV charging

PV installation on roofs and industrial halls, wallboxes and charging stations.

Complete teams with a site lead

A crew with its own lead, tools and transport that takes over an entire project phase.

WHY BAUEL

Verified qualifications

Every electrician has documented certification and hands-on experience. We check both before deployment.

One point of contact

You deal with one coordinator in English, German or Slovak.

Fast deployment

Shortlist within 48 hours, on site usually within 7 to 14 days.

Paperwork and safety covered

A1 certificates, insurance, safety training and PPE are handled by us.

HOW IT WORKS

01

You send a request

Day 0

Trade, headcount, location and dates. A few lines are enough.

02

We clarify the details

within 24 h

We call you to go through the scope, conditions and price.

03

Named shortlist

within 48 h

You receive worker profiles with qualifications and experience.

04

Start and coordination

from 7 days

The team starts and we handle timesheets, replacements and communication for the whole project.

- ✓ Certified electricians
- ✓ Safety training and PPE

- ✓ A1 certificates and legal posting
- ✓ One contract, one invoice

Need people for a project?
